Previous ACD1 Firmware version information

ACD1 Firmware V1.12 for Win

New Features

- Added 6 new Remote Control commands:
  CON, IDENT, GCON, SFO, SIDENT, GIDENT Refer to "TXn/ACD1 Remote Control Protocol Specifications V1.12".

Fixed Bugs

- Fixed a problem where remote control performance was slow when receiving continuous control data for multiple commands.

- Fixed a problem where when monitoring levels of two or more amplifiers with the GCMT command, several amplifiers would return the same level meter values.

- Fixed a problem where when monitoring levels of two or more amplifiers with the GCMT command, turning off one amplifier caused other amplifiers to stop transmitting level meter data.
